Author Index

Abrashev, M., Dincheva, E. and Lazarov, P.
The effect of individual differences in processing auditory discrimination task: an ERP study 107 (Abstract)
Ádám, G.
Visceral perceptions: a theory of its manifold borderline nature 109 (Abstract)
Ádám, G., see Balázs, L. 123 (Abstract)
Ádám, G., see Bardos, G. 128 (Abstract)
Ádám, G., see Lang, E. 287 (Abstract)
Ádám, G., see Nagy, J. 328 (Abstract)
Ádám, G., see Weisz, J. 435 (Abstract)
Aiwasjan, T., see Richter-Heinrich, E. 371 (Abstract)
Aladjov, M., see Nikolov, N.D. 337 (Abstract)
Albrecht, V.
A robust estimator of single evoked activity 109 (Abstract)
Albrecht, V., see Dvorák, I. 191 (Abstract)
Aldasheva, A.A., see Shanazarov, A.S. 388 (Abstract)
Aleksandrov, I.O.
Decision making in tic-tac-toe: a psychophysiological study 111 (Abstract)
Aleksanyan, Z.A., Vassilevsky, N.N., Kisselev, I.M., Moiseeva, N.I. and Buchko, V.M.
Human slow-wave activity in heart rate and central nervous system related to different functional states 112 (Abstract)
Alexandrov, Yu.I.
Change of neuronal specialization as an index or reorganization of the memory store after local brain damages 114 (Abstract)
Alho, K., Paavilainen, P., Reinikainen, K., Sams, M. and Näätänen, R.
Scalp distribution of the mismatch negativity in the auditory event-related brain potential to an infrequent stimulus change 115 (Abstract)
Alho, K., see Näätänen, R. 326 (Abstract)
Alho, K., see Winkler, I. 439 (Abstract)
Allik, J., see Luuk, A. 297 (Abstract)
Allik, J., see Tuulmets, T. 416 (Abstract)
Ambrus, G. and Illyes, S.
Hemispheric differences, information processing and manual reaction time 117 (Abstract)
Andreassi, J.L.
Contributions of psychopathology to developmental problems 118 (Abstract)
Andres, J., see Baltrusch, H.J.F. 124 (Abstract)
Angelov, A., Philipova, D., Silyamova, V., Kolev, V. and Vladova, T.
Motivation and P3-wave of event-related potentials 119 (Abstract)
Angelov, A., see Philipova, D. 353 (Abstract)
Anokhin, A.P.
The genetic aspects of human brain functioning evidence from EEG multi-variate analysis 120 (Abstract)
Arató, M., see Kopp, M.S. 77
Arató, M., see Kopp, M.S. 266 (Abstract)
Arzumanov, Y.L., see Kostandov, E.A. 271 (Abstract)
Aschoff, J.
Circadian temporal adaptation and the perception of time 121 (Abstract)
Aschoff, J., see Roenneberg, T. 374 (Abstract)
Aulmann, H.M., see Baltrusch, H.J.F. 124 (Abstract)

Zwiener, U., see Richter, A. 369 (Abstract)

International Journal of Psychophysiology, 7 (1989) 482–484
Elsevier

Key Word Index

Activation
Contingent negative variation: Impulsiveness; Cognitive function; Laterality; Stress; Arousal; Anxiety, 35

Alpha reactivity
Schizophrenia; Hemisphere; Cognitive task, 47

Anxiety
Contingent negative variation; Impulsiveness; Cognitive function; Laterality; Stress; Activation; Arousal, 35

Arousal
Contingent negative variation; Impulsiveness; Cognitive function; Laterality; Stress; Activation; Anxiety, 35

Auditory threshold
Electrodermal orienting response; Laterality; Somatosensory threshold, 65

Augmenting
EEG; Evoked potential; Reducing; Stimulus intensity; Latency, 453

Basal adrenocortical activity
Dexamethasone suppression test; Electrodermal habituation; Non-specific electrodermal activity; Electrodermal lability; Panic syndrome, 77

Bone marrow
Neuroimmunomodulation; Hypothalamus; Endocrine system; Neuromediator; stress, 1

Cerebral hemisphere
Hypnosis; Hypnotizability; 40-Hz electroencephalogram; 40-Hz electromyogram; Emotion, 85

Cognitive function
Contigent negative variation; Impulsiveness; Laterality; Stress; Activation; Arousal; Anxiety, 35

Cognitive task
Alpha reactivity; Schizophrenia; Hemisphere, 47

Contingent negative variation
Impulsiveness; Cognitive function; Laterality; Stress; Activation; Arousal; Anxiety, 35

Dexamethasone suppression test
Basal adrenocortical activity; Electrodermal habituation; Non-specific electrodermal activity; Electrodermal lability; Panic syndrome, 77

EEG
Evoked potential; Augmenting; Reducing; Stimulus intensity; Latency, 453

Electrodermal habituation
Dexamethasone suppression test; Basal adrenocortical activity; Non-specific electrodermal activity; Electrodermal lability; Panic syndrome, 77

Electrodermal lability
Dexamethasone suppression test; Basal adrenocortical activity; Electrodermal habituation; Non-specific electrodermal activity; Panic syndrome, 77

Electrodermal orienting response
Laterality; Auditory threshold; Somatosensory threshold, 65

Electroencephalogram
Power spectrum; Schizophrenia; Habituation, 55

Emotion
Hypnosis; Hypnotizability; 40-Hz electroencephalogram; 40-Hz electromyogram; Cerebral hemisphere, 85

Endocrine system
Neuroimmunomodulation; Hypothalamus; Neuromediator; Bone marrow; Stress, 1

Evoked potential
EEG; Augementing; Reducing; Stimulus intensity; Latency, 453

Habituation
Electroencephalogram; Power spectrum; Schizophrenia, 55

Heart rate decelerative unconditioned response
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Stimulus substitution; Self-regulation vs cognitive accounts of conditioning, 19

Heart rate decelerative unconditioned response
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Vagal mechanisms; Response topography difference; Left ventricular pressure, 25

Hemisphere
Alpha reactivity; Schizophrenia; Cognitive task, 47

40-Hz electroencephalogram
Hypnosis; Hypnotizability; 40-Hz electromyogram; Cerebral hemisphere; Emotion, 85

40-Hz electromyogram
Hypnosis; Hypnotizability; 40-Hz electroencephalogram; Cerebral hemisphere; Emotion, 85

Human pavlovian heart rate decelerative conditioning
Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Stimulus substitution; Self-regulation vs cognitive accounts of conditioning, 19

Human pavlovian heart rate decelerative conditioning
Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Vagal mechanisms; Response topography difference; Left ventricular pressure, 25

Hypnosis
Hypnotizability; 40-Hz electroencephalogram; 40-Hz electromyogram; Cerebral hemisphere; Emotion, 85

Hypnotizability
Hypnosis; 40-Hz electroencephalogram; 40-Hz electromyogram; Cerebral hemisphere; Emotion, 85

Hypothalamus
Neuroimmunomodulation; Endocrine system; Neuromediator; Bone marrow; Stress, 1

Impulsiveness
Contingent negative variation; Cognitive function; Laterality; Stress; Activation; Arousal; Anxiety, 35

Latency
EEG; Evoked potential; Augmenting; Reducing; Stimulus intensity, 453

Laterality
Contingent negative variation; Impulsiveness; Cognitive function; Stress; Activation; Arousal; Anxiety, 35

Laterality
Electrodermal orienting response; Auditory threshold; Somatosensory threshold, 65

Left ventricular pressure
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Vagal mechanisms; Response topography difference, 25

Negative tilt unconditioned stimulus
Human pavlovian heart rate decelerative conditioning; Heart rate decelerative unconditioned response; Stimulus substitution; Self-regulation vs cognitive accounts of conditioning, 19

Negative tilt unconditioned stimulus
Human pavlovian heart rate decelerative conditioning; Heart rate decelerative unconditioned response; Vagal mechanisms; Response topography difference; Left ventricular pressure, 25

Neuroimmunomodulation
Hypothalamus; Endocrine system; Neuromediator; Bone marrow; Stress, 1

Neuromediator
Neuroimmunomodulation; Hypothalamus; Endocrine system; Bone marrow; Stress, 1

Non-specific electrodermal activity
Dexamethasone suppression test; Basal adrenocortical activity; Electrodermal habituation; Electrodermal lability; Panic syndrome, 77

Panic syndrome
Dexamethasone suppression test; Basal adrenocortical activity; Electrodermal habituation; Non-specific electrodermal activity; Electrodermal lability, 77

Power spectrum
Electroencephalogram; Schizophrenia; Habituation, 55

Reducing
EEG; Evoked potential; Augmenting; Stimulus intensity; Latency, 453

Response topography difference
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Vagal mechanisms; Left ventricular pressure, 25

Schizophrenia
Alpha reactivity; Hemisphere; Cognitive task, 47

Schizophrenia
Electroencephalogram; Power spectrum; Habituation, 55

Self-regulation vs cognitive accounts of conditioning
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Stimulus substitution, 19

Somatosensory threshold
Electrodermal orienting response; Laterality; Auditory threshold, 65

Stimulus intensity
EEG; Evoked potential; Augmenting; Reducing; Latency, 453

Stimulus substitution
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Self-regulation vs cognitive accounts of conditioning, 19

Stress
Contingent negative variation; Impulsiveness; Cognitive function; Laterality; Activation; Arousal; Anxiety, 35

Stress
Neuroimmunomodulation; Hypothalamus; Endocrine system; Neuromediator; Bone marrow, 1

Vagal mechanisms
Human pavlovian heart rate decelerative conditioning; Negative tilt unconditioned stimulus; Heart rate decelerative unconditioned response; Response topography difference; Left ventricular pressure, 25
